

FIS INSURANCE RISK SUITE

FORMERLY PROPHET

The Multi-award-winning Insurance Risk Management System

Today's insurers quickly must react to volatile markets and model different scenarios for mortality, morbidity, persistency and other socio-economic trends.

You need not just a high performing and scalable platform; you need access from anywhere at any time, as well as strong governance, operational control, regulatory compliance and data quality.

FIS® Insurance Risk Suite (formerly Prophet) empowers you on every front. It gives you the flexibility to model and analyze complex risks across

your enterprise, in a tightly governed but high-performance environment – on-premise or through the cloud.

With extensive global regulatory, product and actuarial calculations as standard and a highly scalable, governed end-to-end risk platform, you can not only improve risk and regulatory reporting but also strengthen how you manage your capital and business.

No wonder Insurance Risk Suite wins multiple industry awards every year.

MANAGE RISK AND REGULATION

With more than 20 actuarial libraries, you can model your entire financial services business. Price out new contracts, carry out sophisticated asset liability management, and meet requirements for regulations such as IFRS 17, Solvency II, U.S. GAAP LDTI head on.

STREAMLINE YOUR OPERATIONS

Automate and scale actuarial modeling, risk management and reporting with a single platform for life, health, pensions, financial services and non-life – and centralize code, assumptions and policy data.

OPTIMIZE PERFORMANCE

With the latest innovative technology, you can run more calculations faster. Plus you can write and store higher volumes of more detailed results for greater business insights and more profitable products.

FIS INSURANCE RISK SUITE

The Multi-award-winning Insurance Risk Management System

EMPOWER AND CONTROL YOUR ACTUARIAL MODELS

Insurance Risk Suite offers separate environments for development and production. Produce clear, easily comprehensible actuarial models, with full control and audit across data input, results output and end-to-end workflow. And perform nested calculations and reuse the same model for many purposes.

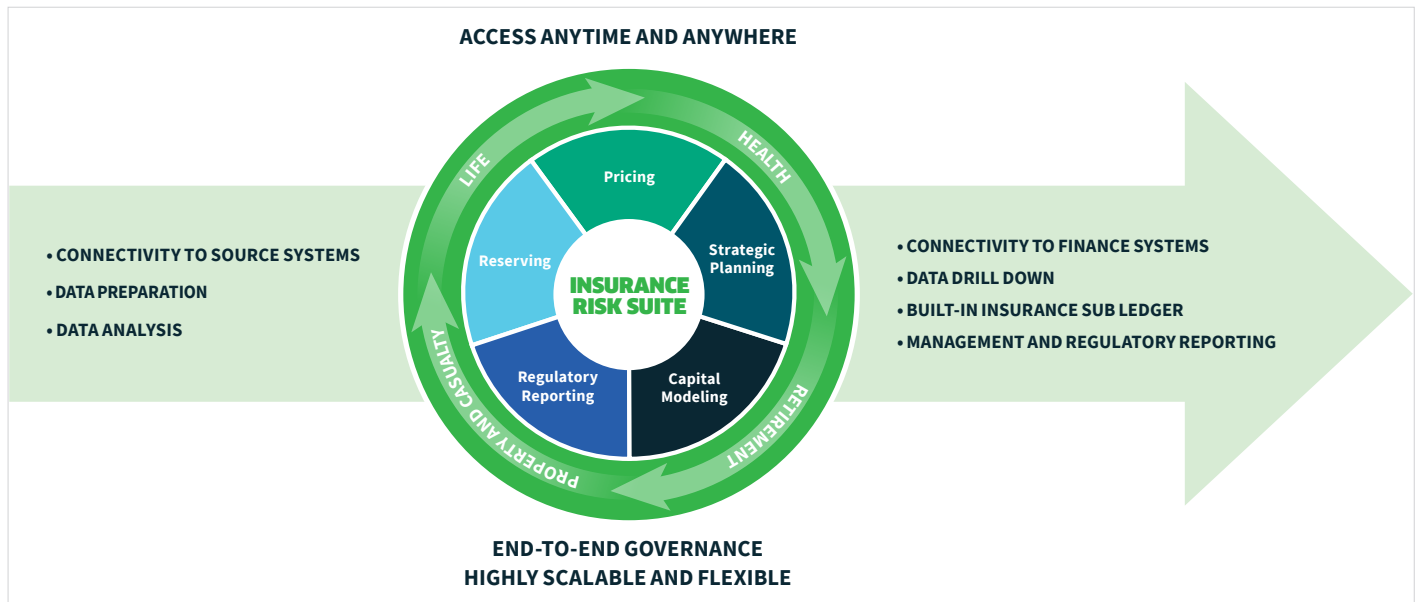

PREPARE FOR REGULATORY CHANGE

Support compliance with IFRS 17 and LDTI with extensive calculations, data management, integration with sub-ledger or general ledger. With holistic

process control, get tools for improving traceability, governance, data management and connectivity between the actuarial and finance teams.

DELIVER A RISK PLATFORM THAT MEETS YOUR NEEDS

Whether you're a multinational and multi-line insurer or a smaller insurer writing just one line of business, our range of managed cloud solutions helps you provide a more agile platform and reduce costs. Simplify billing and only pay for the compute power you consume – and get regular upgrades with access to the latest features.

Manage your insurance risk with flexibility and control.
